Projects

Project Title: Upskill Educom Online Exam Portal

Description:
Designed and developed a comprehensive online exam portal to streamline the examination process for educational institutions. The portal provides a user-friendly interface for both administrators and students, allowing for easy creation, management, and taking of exams in a digital environment. Features include customizable exams, automated grading, and real-time results for students. The portal is built with scalability and security in mind, ensuring reliable performance and data protection.
